REMARKS

The application has been amended to indicate the proper claim to priority. The claim to priority of the parent application, U.S. Application 09/161,122, has been amended in the Amendment filed September 5, 2002 in U.S. Application No. 09/161,122; a copy of the Amendment of September 5, 2002 is submitted herewith (Exhibit C). Upon entry of the present amendment, the earliest date of priority of the present continuation application of U.S. Application No. 09/161,122 is September 30, 1994.

Claims 1-24 were pending in this application. Claims 1-24 were canceled without prejudice to Applicants' right to prosecute the subject matter of claims 1-24 in one or more continuation, continuation-in-part, or divisional applications. New claims 25-37 were added to clarify what Applicants consider as their invention. Support for the new claims can be found in the specification as originally filed as well as in the specification of the earliest priority application (issued as U.S. Patent No. 5,840,520), e.g., as set forth in the chart below.
